#### **Sensor Connection**

It is possible to connect either 1 or 3 sensors on terminals Al2 or Al3.

#### Sink / Source Switch Configuration

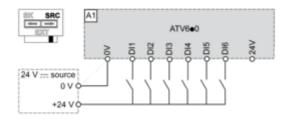

The switch is used to adapt the operation of the logic inputs to the technology of the programmable controller outputs.

- Set the switch to Source (factory setting) if using PLC outputs with PNP transistors.
- Set the switch to Ext if using PLC outputs with NPN transistors.

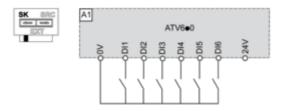

#### Switch Set to SRC (Source) Position Using the Output Power Supply for the Digital Inputs

#### Switch Set to SRC (Source) Position and Use of an External Power Supply for the DIs

#### Switch Set to SK (Sink) Position Using the Output Power Supply for the Digital Inputs

#### Switch Set to EXT Position Using an External Power Supply for the DIs
